1. Create index page where user can add new to-do tasks and view the to-do list
   a. 2 input from user: task and deadline
   b. Confirmation button
   c. To-do list headers: To-do, Completed, Overdue
2. Every task will be documented by a new page
   a. The task page will include a button for the user to mark its completion
   b. The task page will include a button for the user to delete the task
   c. The task page will allow the user to modify the task and/or deadline
   d. The completion status of the task will determine how it is sorted on the index page

Current Problem:

- How to create a new page for each task
- How to show the tasks on the index page
